## Summary

Hello, my name is Darius Uscinavicius, and I am a fullstack application engineer. I leverage my skills in Java, SQL, React, and Kubernetes to develop and deploy cloud-based solutions that enhance the customer experience and drive business growth. I graduated with a bachelor's degree in computer science from Northern Illinois University in May 2020, and I have over three years of experience in the fintech industry. I am passionate about learning new technologies and applying them to solve real-world problems. I collaborate with a diverse and talented team of engineers, product managers, and business analysts to deliver innovative and scalable products that meet the needs and expectations of millions of users. I am committed to excellence, quality, and security in every aspect of my work.

## Experience

### Senior Associate Software Developer

Discover Financial Services

Jun 2020 - Present (3 years 5 months)
